

**Supplemental Figure 2. Deming regression analyses for body composition and total body water estimates measured by SWBIA and the criterion DXA and BIS in females.** Deming regression plots for BF% (leftmost column), FM, FFM, and TBW (rightmost column) estimates by SWBIA body position (rows) are displayed. The solid black line on each plot represents the line of identity and the red dashed line represents the regression line.

SWBIA: smartwatch bioelectrical impedance analysis; DXA: dual-energy X-ray absorptiometry; BIS: bioelectrical impedance spectroscopy. BF%: body fat percentage; FM: fat mass; FFM: fat-free mass; TBW: total body water;
